Medical education, filtered for you

Day 1 - Emergency Essentials

24/05/2027 | 8:30am - 3:30pm | Crowne Plaza

8:30am – 9:00am

Registration

9:00am – 9:30am

Welcome & Learning Objective Outline

9:30am – 10:30am: Dr Jonathan Papson

Travel Fever

10:30am – 10:45am

Morning Tea & Coffee

10:45am – 11:30am Dr Catriona Moynihan

Family Violence & Sexual Assault - How to Recognise & React

11:30am – 12:15pm Fijian Guest Speaker - TBC

Advancing Emergency Care in the Pacific

12:15pm - 12:45pm

LUNCH

12:45pm – 1:30pm Dr Emma Paterson

Obs & Gyn Emergencies in the ED

1:30pm – 2:15pm Kelsey O'Neil & Melvin Khor

Multi-disciplinary Team Training & the Art of Emergency Nursing

2:15pm – 2:30pm

Afternoon Tea & Coffee

2:30pm – 3:30pm Dr Amaali Lokuge

Echo in the ED - Early Diagnosis & Decision Making

Day 2 - Trauma & Retrieval Concepts

25/05/2027 | 8:30am - 2:30pm | Crowne Plaza

9:00am – 9:45am Dr Jonathan Papson
Team Training & Trauma Reception

9:45am – 10:30am: Dr Jimmy Xavier
Retrieval Medicine in the Military Setting

10:30am – 10:45am
Morning Tea & Coffee

10:45am – 11:30am Dr Luke De La Rue
Fatigue & CRM - A Case Based Discussion

11:30am – 12:15pm Fijian Guest Speaker - TBC
Mass Casualty Preparedness in the Pacific

12:15pm - 12:45pm
LUNCH

12:45pm – 1:30pm Dr Lisa Walker
Clinical Toxicology & Festival Medicine

1:30pm – 2:15pm Dr David Camilleri
Trauma Hypotheticals & HALO Procedures

2:15pm – 2:30pm
Afternoon Tea & Coffee

Day 3 - Specialist Insights

26/05/2027 | 8:30am - 2:30pm | Crowne Plaza

9:00am – 9:45am Dr Kate Bryan
Paediatrics & Non-accidental Injury

9:45am – 10:30am: Dr Winnie Yu
Medicine & Sustainability - How to Make a Difference

10:30am – 10:45am
Morning Tea & Coffee

10:45am – 11:30am Sam Page
Demystifying Dizziness - Assessment of Vertigo

11:30am – 12:15pm Dr Kaleb Lourensz
General Surgical Emergencies - Core Knowledge

12:15pm - 12:45pm
LUNCH

12:45pm – 1:30pm Dr Evelyne Cheng
Primary Care in the ED Setting

1:30pm – 2:15pm Dr Nandini Choudhury
Paediatric ED Pearls & Pitfalls

2:15pm – 2:30pm
Afternoon Tea & Coffee

Please note - this is our draft program and there may be some minor changes in the lead up to the event

Day 4 - Workshops

27/05/2027 | Crowne Plaza

WORKSHOP 1

FONA: Critical Airway Access

Front of neck access is a high acuity, low occurrence (HALO) procedure that is an essential emergency airway management skill for all critical care clinicians.

Gain valuable insights into when and how to act in order to provide safe and timely oxygenation in the critically unwell.

Dissolve the fear and stigma associated with this procedure through hands-on, high volume repetition practicals so that you can execute when called upon.

Join us to build the confidence, competence, and muscle memory necessary to perform a surgical airway, because in that pivotal moment, progressing to FONA is not a failure - it's a critical lifesaving procedure!

WORKSHOP 2

PoCUS: Mastering EFAST & RUSH

Learn from expert clinicians how to rapidly assess and diagnose the causes of undifferentiated shock and trauma at the bedside.

Through case based discussions and a practical group session involving hands on scanning you'll master the systematic techniques of EFAST and RUSH focusing on both the acquisition and interpretation of images in the shocked patient.

Build confidence in your scanning abilities and incorporate these core skills into your daily practice to expedite clinical care in the critically unwell.

Supplemented by educational modules that can be accessed at any time - join us and become proficient in rapid diagnostic point of care ultrasound!

**WORKSHOP 2**

Total Duration: 150 mins (2.5hrs)

PoCUS: Mastering EFAST & RUSH

Learn from expert clinicians how to rapidly assess and diagnose the causes of undifferentiated shock and trauma at the bedside.

Through case based discussions and a practical group session involving hands on scanning you'll master the systematic techniques of EFAST and RUSH focusing on both the acquisition and interpretation of images in the shocked patient.

Build confidence in your scanning abilities and incorporate these core skills into your daily practice to expedite clinical care in the critically unwell.

Supplemented by educational modules that can be accessed at any time - join us and become proficient in rapid diagnostic point of care ultrasound!

Introduction

- Why EFAST
- Minimum required views
- What is RUSH and HIMAP
- Discussion of clinical application

mindray**Practical Hands-On Scanning Session**

- Scan real patients with expert real time feedback
- Optimize image acquisition and interpretation
- Review examples of scans with real pathology

Application of RUSH

- Case based application
- Improve image acquisition under pressure
- Develop clinical synthesis leading to early diagnosis and decision making

Session Sponsor - Mindray

- A huge thank you to Mindray for providing their cutting edge point of care devices and clinical expertise for this workshop

WORKSHOP 1

Total Duration: 150 mins (2.5hrs)

FONA: Critical Airway Access

Front of neck access is a high acuity, low occurrence (HALO) procedure that is an essential emergency airway management skill for all critical care clinicians.

Gain valuable insights into when and how to act in order to provide safe and timely oxygenation in the critically unwell.

Dissolve the fear and stigma associated with this procedure through hands-on, high volume repetition practicals so that you can execute when called upon.

Join us to build the confidence, competence, and muscle memory necessary to perform a surgical airway, because in that pivotal moment, progressing to FONA is not a failure - it's a critical lifesaving procedure!

Introduction: The Imperative for FONA

- The Why Behind FONA: Discussion on FONA as a HALO procedure and human factors.
- Algorithm Discussion: Revisiting pre-existing difficult airway algorithms and their limitations.
- Reframing the Stigma: Transitioning from a "failed airway" to "critical airway access".

AMAX4 and the Human Factors of Crisis

- Lessons from Sentinel Events and the Development of AMAX4
- Anaphylaxis/Severe Asthma
- The Hard Deck Principle

Clinical Application of FONA

- Case Based Discussions

Simulation Session: Team Dynamics & Decision-Making

- Team Based Focus on double setup, vocalising the shift, team briefing

Practical Hands-On Session: Team Based Technical Execution

- Anatomical Review: Discussion of the anatomy and margins of safety.
- Target Acquisition: Practicing the laryngeal handshake and standardising an approach.
- The Tactile Sequence: Step-by-step high repetition practice using Cric-A-Lot Trainers.
- Contextualisation and Complication Mitigation
